

## Recent Leander and Surrounding Fires

City of Leander with the efforts of various agencies, many local churches, numerous local business, community organizations, and the community have been active in providing assistance to the victims of the recent fires in Leander and the surrounding areas. It has been inspirational to see how quickly the local community has responded to meet the current needs of the victims of these devastating fires by providing an abundance of food, clothing, school supplies, furniture, as well as temporary shelter for those families who were displaced from their homes by these events.

Many families that have suffered severe damage or total loss of their homes and as a result of the strong commitment from the City of Leander and the generous outpouring of community support, most of the families' immediate needs are being met. However, the need is ongoing in our communities at large. We know there will be a need for additional support as we assist these families to relocate and/or rebuild their homes and reestablish their lives. Financial donations will be the most critical need as we assist them with their transitions. Financial donations can be made to the following agencies:

[Red Cross](#)

[Austin Disaster Relief Network](#)

[Salvation Army](#)

[WBC Opportunities](#)
